Speaker : Mr. George Wong

Highlight of the Seminar:

In 2017, the HKSAR Government decreed that BIM technology must be used in the design and construction of all major government capital works projects with a project estimate of more than HK\$30 million that were scheduled to start during or after 2018, and that the use of this technology in private construction projects should also be promoted. This has generated a surge in demand for BIM personnel and training needs.

To ensure that construction professionals have appropriate skill levels and competency in using BIM technology, and that the scope and quality of BIM training courses provided in the market meet the requirements, it was important to establish a certification body for BIM personnel and an accreditation body for BIM training courses in Hong Kong.

To facilitate the healthy development of BIM in Hong Kong, CIC has introduced the Building Information Modelling Personnel Certification and Training Course Accreditation Schemes (the "Schemes") to ascertain the competency of BIM personnel and the quality of local BIM training courses. This briefing aims to raise your understanding on the Schemes including the objective, eligibility, application procedures and assessment criteria, etc. You are cordially invited to attend the briefing to prepare for application of the Schemes.
